Ronak Pawar

Nashik, Maharashtra | ronakpawar488@gmail.com | +91 8788237142 | GitHub | LinkedIn

Professional Summary

Full Stack Developer specializing in MERN Stack development with experience building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in designing RESTful APIs, implementing authentication and authorization systems, integrating third-party services, and developing responsive user interfaces. Experienced in end-to-end application development, database design, cloud integrations, and deployment workflows. Strong problem-solving abilities with a focus on performance optimization, clean architecture, and delivering production-ready solutions.

Education

K.K. Wagh Institute of Engineering Education and Research 2022 – 2026
Bachelor of Technology (Computer Engineering), CGPA: 8.0

Technical Skills

Languages: JavaScript, Python, C++, Java
Frontend Development: React.js, Vite, HTML, CSS, Responsive Web Design, React Router, Axios, State Management, API Integration
Backend Development:Node.js, Express.js, RESTful APIs, JWT Authentication, Role-Based Access Control (RBAC), Middleware Development
Databases: MongoDB, Mongoose, MySQL, SQL
Software Engineering : Full Stack Development, Authentication & Authorization, Database Design, Agile Development
Databases & Infrastructure: SQL, MongoDB, Data Pipelines

Experience

Machine Learning Intern March 2026
Medhavyn Technologies PVT. LTD.
- Developed computer vision solutions for automated object dimension measurement using Python and OpenCV.
- Built image preprocessing, augmentation, annotation, and feature extraction pipelines for large-scale datasets.
- Trained, evaluated, and optimized machine learning models using performance metrics and experimental validation.
- Collaborated on deployment-ready AI solutions with a focus on accuracy, scalability, and reliability.

Full Stack Developer Intern Dec 2025 – Feb 2026
AARK Packaging Industries
- Developed and maintained RESTful APIs using Node.js and Express.js for ERP-related business operations.
- Integrated frontend and backend modules to streamline inventory management and operational workflows.
- Collaborated with stakeholders to analyze business requirements and implement scalable software solutions.

Projects

Urban Bike Pooling Platform | *[Github]* Jan 2025
- **Technologies:**React.js, Node.js, Express.js, MongoDB, JWT, REST APIs
- Developed a full-stack bike pooling platform enabling users to create, search, and join ride-sharing routes.
- Designed secure authentication and authorization using JWT-based login and protected routes..
- Implemented MongoDB database schemas for users, rides, bookings, and trip history.
- Built RESTful APIs for ride management, booking operations, user profiles, and route coordination.

Fodoos – Full Stack Food Ordering & Payment Platform | *[Github]* Nov 2025
- **Technologies:** React, Node.js, Express.js, MongoDB, JWT, Stripe
- Developed a full-stack food ordering platform with secure JWT authentication and role-based access control
- Built responsive React interfaces with React Router and integrated REST APIs using Axios.
- Implemented shopping cart, order management, and Stripe payment gateway integration.

Trimurti Fabrication – Full Stack Business Management Platform | *[Github]* June 2025
- **Technologies:** React, Node.js, Express.js, MongoDB, JWT
- Architected a full-stack fabrication business platform with a React frontend and an Express + MongoDB REST API.
- Built JWT-secured admin routes for gallery image uploads/deletes and review moderation, with Cloudinary and Multer handling media storage.
- Designed a CORS-safe blob download flow for the public gallery, with a Cloudinary URL fallback for image downloads.

Certifications

- **MERN Stack Development** – Apna College (2025)
- **Data Science** – Code With Harry (2026)
